Local Area Coordinators

What is Local Area Coordination?

Local Area Coordination is an innovative approach to supporting people with any type of need including our carers and families.

As Local Area Co-ordinators (LACs) our aim and core purpose is to provide a holistic support service, to help people achieve their vision of a good life and what matters to them. We take time to work with individuals to achieve their values and beliefs and support them to build circles of friends and support.

We work with our communities, faith and voluntary groups across the borough to help strengthen partnerships and relations.

This helps to reduce demand on public services, preventing people from reaching crisis, and requiring costly care and support service
